📍 Ahmedabad, Gujarat

RHCSA & AWS-certified engineer with hands-on experience in cloud automation, containerization, and infrastructure as code. Passionate about building reliable, scalable systems using modern DevOps practices. Seeking an entry-level role in DevOps or Cloud where I can contribute to real-world automation and system reliability.

EDUCATION

Bachelor of Engineering in Information Technology <i>Sal College of Engineering</i>	2022 – 2026 Ahmedabad
Higher Secondary Certificate <i>Kameshvar Vidhya Mandir international school</i>	2020 – 2022 Ahmedabad

PROFESSIONAL EXPERIENCE

Intern <i>Grras IT Solutions</i>	Dec 2025 – Present Ahmedabad
Deployed a secure, scalable three-tier NodeJS app on AWS using EC2, RDS, load balancers, and VPC architecture.	

CERTIFICATIONS

<u>Red Hat Certified System Administrator (RHCSA)</u> 🔗 Practical skills for RHEL systems	<u>AWS Solutions Architect Associate</u> 🔗 AWS cloud architecture design
<u>Coursera IT Automation with Python</u> 🔗 Python scripting, Git, and system automation	<u>Coursera Cyber security</u> 🔗 Network security, threats, and risk mitigation

PUBLICATIONS

<u>A Cost-Aware and Performance-Optimized IaC Framework for Hybrid Cloud Deployments on AWS</u> 🔗 <i>IJRPR, Vol 7, Issue 4 (2026)</i>	Apr 2026
Built Terraform-based hybrid cloud architecture with cost/performance trade-off analysis.	

SKILLS

Languages & Scripting: Python, Node.js, Bash

Operating System: Red Hat Linux (RHCSA certified – see certificates)

Cloud and IaC: AWS (Solutions Architect Associate), Terraform

Containers & Orchestration: Docker, Docker Compose, Kubernetes

Configuration Management: Ansible

Version Control: Git, GitHub

CI/CD: Jenkins

Monitoring: Prometheus, Grafana

PROJECTS

FeedReader

Multi-user RSS/Atom Feed reader with Node.js, MySQL (RDS), nginx, and AWS ALBs – fully automated infrastructure via Terraform.

- **Tools:** Docker, AWS (RDS, ALB, nginx), Terraform, Node.js, MySQL
- **My Role:** Wrote Terraform configs to provision the entire AWS stack (VPC, RDS, ALB, EC2) and packaged the Node.js app with Docker.
- **Link:** <https://github.com/Mdskun/FeedReader> 

Real-Time Chat Application

Full-stack chat system with JWT authentication and containerized deployment.

- **Tools Used:** Django REST, React, JWT, Docker, PostgreSQL
- **My Role:** Built Django REST APIs and React frontend from scratch. Implemented JWT auth and wrote Docker Compose configs for dev/prod environments.
- **Link:** <https://github.com/Mdskun/Real-Time-Chat-Application> 

Secure Polling App

Production-ready voting app with encrypted ballots and tamper-proof ledger (blockchain-style).

- **Tools Used:** Python, Flask, Encryption, Blockchain-style Ledger, Docker
- **My Role:** Built encrypted voting system with blockchain-inspired verification ledger. Created admin dashboard and deployed with Docker.
- **Link:** <https://github.com/Mdskun/secure-polling-app> 

Log Analyser

High-performance log file analyzer supporting multiple formats and ML-based pattern detection.

- **Tools Used:** Python, Streamlit, Docker Compose, Machine Learning (basic)
- **My Role:** Built Streamlit UI and log parsing engine. Added clustering for pattern detection and deployed using Docker Compose.
