mdskun.github.io/my-portfolio Ahmedabad,Gujarat

DevOps Engineer with hands-on experience in AWS, Terraform, Docker, Kubernetes, Jenkins, Ansible, and Red Hat Linux. Experienced in provisioning cloud infrastructure through Infrastructure as Code, containerizing applications, and building CI/CD workflows. RHCSA, RHCE, and AWS Solutions Architect Associate certified.

Education

Bachelor of Engineering in Information Technology 2022 – 2026
Sal College of Engineering Ahmedabad

Higher Secondary Certificate 2020 – 2022
Kameshvar Vidhya Mandir international school Ahmedabad

Professional Experience

DevOps Intern Jan 2026 – Present
Grras IT Solutions Ahmedabad

- Provisioned and managed AWS infrastructure using Terraform, including EC2, RDS, VPC, and load balancers.
- Designed reusable Terraform modules to standardize infrastructure deployment and improve scalability.
- Implemented Infrastructure as Code (IaC) practices with Terraform, enabling version control and automated provisioning.

CERTIFICATIONS

- **Red Hat Certified System Administrator (RHCSA):** Practical skills for RHEL systems | Certification ID: 260-000-559
- **Red Hat Certified Engineer in Ansible(RHCE):** Practical skills for Configuration management | Certification ID: 260-000-559
- **AWS Solutions Architect Associate:** AWS cloud architecture design | Validation no: cc095bb6234a41269778174ce1ba183a

Skills

Languages & Scripting
Python, Node.js, Bash

Containers & Orchestration
Docker, Docker Compose, Kubernetes

CI/CD
Jenkins, GitHub Actions

Operating System
Red Hat Linux (RHCSA certified)

Configuration Management
Ansible

Monitoring
Prometheus, Grafana

Cloud and IaC
AWS (Solutions Architect Associate), Terraform

Version Control
Git, GitHub

Projects

FeedReader
Multi-user RSS/Atom Feed reader with Node.js, MySQL (RDS), nginx, and AWS ALBs – fully automated infrastructure via Terraform.

- **Tools**: Docker, AWS (RDS, ALB, nginx), Terraform, Node.js, MySQL
- **My Role**: Wrote Terraform configs to provision the entire AWS stack (VPC, RDS, ALB, EC2) and packaged the Node.js app with Docker.
- **Link**: https://github.com/Mdskun/FeedReader

Pulse-Real-Time Chat Application
Pulse is a production-grade real-time chat platform built with Django, Channels, Redis, and React. WebSocket messaging, JWT auth, typing indicators, live presence, read receipts, and activity sorting — Dockerized and shipped to Kubernetes via a Jenkins CI/CD pipeline.

- **Tools Used**: Django REST, React, JWT, Docker, PostgreSQL, Jenkins, kubernetes
- **My Role**: Built Django REST APIs and React frontend from scratch. Implemented JWT auth and wrote Docker Compose configs for dev/prod environments.
- **Link: https://github.com/Mdskun/Pulse-Real-Time-Chat-App**

Secure Polling App
Production-ready voting app with encrypted ballots and tamper-proof ledger (blockchain-style).

- **Tools Used**: Python, Flask, Encryption, Blockchain-style Ledger, Docker, kubernetes, helm, GitHub actions
- **My Role:** Built encrypted voting system with blockchain-inspired verification ledger. Created admin dashboard and deployed with Docker and wrote Github action workflow.
- **Link**: https://github.com/Mdskun/secure-polling-app

Log Analyser
High-performance log file analyzer supporting multiple formats and ML-based pattern detection.

- **Tools Used**: Python, Streamlit, Docker Compose, Machine Learning (basic)
- **My Role**: Built the log parsing engine and Streamlit interface for Log Analyser, Then deployed it with Docker compose to support repeatable local execution.
- **Link**: https://github.com/Mdskun/Log-analyser
