RHCSA & AWS-certified engineer with hands-on experience in cloud automation, containerization, and infrastructure as code. Passionate about building reliable, scalable systems using modern DevOps practices. Seeking an entry-level role in DevOps or Cloud where I can contribute to real-world automation and system reliability.

EDUCATION

Bachelor of Engineering in Information Technology 2022 – 2026 | Ahmedabad
Sal College of Engineering

Higher Secondary Certificate 2020 – 2022 | Ahmedabad
Kameshvar Vidhya Mandir international school

PROFESSIONAL EXPERIENCE

DevOps Intern Dec 2025 – Present | Ahmedabad
Grras IT Solutions

- Provisioned and managed AWS infrastructure using Terraform, including EC2, RDS, VPC, and load balancers.
- Designed reusable Terraform modules to standardize infrastructure deployment and improve scalability.
- Implemented Infrastructure as Code (IaC) practices with Terraform, enabling version control and automated provisioning.

SKILLS

Languages & Scripting

Python, Node.js, Bash

Containers & Orchestration

Docker, Docker Compose, Kubernetes

CI/CD

Jenkins, GitHub Actions

Operating System

Red Hat Linux (RHCSA certified – see certificates)

Configuration Management

Ansible

Monitoring

Prometheus, Grafana

Cloud and IaC

AWS (Solutions Architect Associate), Terraform

Version Control

Git, GitHub

CERTIFICATIONS

Red Hat Certified System Administrator (RHCSA) [↗](#)

Practical skills for RHEL systems
Certification ID: 260-000-559

Red Hat Certified Engineer in Ansible(RHCE)

Practical skills for Configuration management
Certification ID: 260-000-559

AWS Solutions Architect Associate [↗](#)

AWS cloud architecture design
Validation no:
cc095bb6234a41269778174ce1ba183a

PROJECTS

FeedReader

Multi-user RSS/Atom Feed reader with Node.js, MySQL (RDS), nginx, and AWS ALBs – fully automated infrastructure via Terraform.

- **Tools:** Docker, AWS (RDS, ALB, nginx), Terraform, Node.js, MySQL
- **My Role:** Wrote Terraform configs to provision the entire AWS stack (VPC, RDS, ALB, EC2) and packaged the Node.js app with Docker.
- **Link:** <https://github.com/Mdskun/FeedReader> [↗](#)

MCP Filesystem Agent

A production-ready Model Context Protocol (MCP) server enabling Claude and other LLMs to perform intelligent file operations with minimal token usage.

- **Tools Used:** python, Docker compose, Model Context Protocol(MCP)
- **My Role:** Built MCP-based backend using Node.js with filesystem automation tools; containerized using Docker & Docker Compose. Provisioned scalable infrastructure using Terraform and ensured reliable integration between MCP server and LLM APIs.
- **Link:** <https://github.com/Mdskun/MCP-Filesystem-Agent.git> [↗](#)

Secure Polling App

Production-ready voting app with encrypted ballots and tamper-proof ledger (blockchain-style).

- **Tools Used:** Python, Flask, Encryption, Blockchain-style Ledger, Docker
- **My Role:** Built encrypted voting system with blockchain-inspired verification ledger. Created admin dashboard and deployed with Docker and wrote Github action workflow.
- **Link:** <https://github.com/Mdskun/secure-polling-app> [↗](#)

Log Analyser

High-performance log file analyzer supporting multiple formats and ML-based pattern detection.

- **Tools Used:** Python, Streamlit, Docker Compose, Machine Learning (basic)
- **My Role:** Built Streamlit UI and log parsing engine. Added clustering for pattern detection and deployed using Docker Compose.
